Echo Dot timer ring simulator

Frames come from the real `em_timer_ring.py` in the EchoMuse clone, so this is what the controller would send. Top view: 12 o'clock is above Vol+.

none angle 0.0° sim 11h 22m 55s

TIMERS

10 s | 30 s | 1 min | 5 min | 25 min | 45 min | 1 h | 1 h 15 | 2 h 15

minutes 25 seconds 0 Add Clear all

speed 60× Pause scrub front timer

Click the dot (action button) in the drawing to stop a ringing timer.

SITUATIONS

Mute: off | Mute shows: dim red + white dot (proposed, needs firmware)

Say "Hey Jarvis" (3 s turn) | Announcement (4 s) | Volume arc (2 s) | LED numbers

Turns, announcements and the volume arc take the ring. The countdown comes back when they end.
